## Installation, maintenance and usage tips:

Congratulations, you have the Silo clock!

The Silo clock is made of concrete. As a result, its appearance can vary (little bubbles and a slightly varied tone). In short, it has all the charm of a unique item for your home!

To set the time, use the mechanism on the back of the clock. Moving the needles with your hands can damage the mechanism.

This clock is designed for indoor use and in dry locations only.

For your Silo to remain beautiful, be sure to remove any dust with a damp cloth without using detergent.

A succulent plant is shipped with the clock. We advice to repot it directly into the concrete container by mixing with specific cactus soil. The plant should be watered once a month. Please, water it with moderation: excess water is the worst enemy of your plant!

Just like any plant, we will avoid sudden change of temperature or brightness but once installed in a bright place, it will bloom!

**DO NOT PUT THE TOUPIE WITHIN REACH OF CHILDREN UNDER 10 YEARS.**

Power supply: AA (LR6) battery  
**not included**
