

TOUPIE

DESK CLOCK

Installation, maintenance and usage tips:

Congratulations, you have the Toupie!

So take care when unpacking and place the pieces on a flat surface to prevent damage.

The Toupie clock is made of wood (with an eco-friendly water-based varnish) and is therefore alive! As a result, its appearance can vary (grainy, shaded). The concrete in the dial can also have little bubbles and a slightly varied tone. In short, it has all the charm of a unique item for your home!

The seal connecting the two pieces of wood is made of rubber and is therefore quite delicate. It is advisable to perform a rotating action when assembling or disassembling (for changing the battery or the time).

Your Toupie can balance by itself (as long as it is placed on a flat and level surface).

To set the time, use the mechanism on the back of the clock. Moving the needles with your hands can damage the mechanism.

This clock is designed for indoor use and in dry locations only.

For your Toupie to remain beautiful, be sure to remove any dust with a damp cloth without using detergent.

In conclusion, be reasonable, use your Toupie in normal use!

With Gone's take care of the planet!

Without trying to give you any orders, please understand that you are solely responsible to dispose of your used equipment, and for this purpose you are required to return it to a designated collection point for the recycling of electrical and electronic equipment.
